

Novatel Wireless

strategic partner

pc card modem manufacturer

"We are excited at the prospects of working with Junxion as they release their new product. We see Junxion fulfilling a real need in the wireless data market with their device and we also see this as an opportunity for incremental revenue for our products as well as a source for new data service activations for wireless carriers."

- Brad Weinert

VP of Business Development

Trio Teknologies

distribution partner

United States

"The Junxion Box represents the next step in wireless data evolution as we have the convergence of wireless local area network (WLAN) and wireless wide area network (WWAN) technologies in one box providing a unique and compelling solution to numerous mobile or static vertical applications. End-users with 802.11 equipped laptops and handhelds can essentially use the Junxion Box as a mobile wireless access point. It provides group network access anywhere the carriers have coverage on their national CDMA and GPRS networks."

- Gordon Dahl

President

California Department of Transportation ("Caltrans")

government customer

portable networks, landline data service back-up

"The Junxion Box is a truly useful yet simple and cost-effective solution for our Mobile Operations Unit. After our initial testing of the 'green box' we realized this device opens up new data service solution applications in the areas of maintenance and construction in the field. In addition, it can provide emergency office connectivity if our wired connection fails. This device opens up wireless applications for our Department that were not available before."

- Spokesperson

Caltrans District 4

Ironman Wetsuits

small business customer

landline data service back-up

"Online data connectivity is mission-critical to our fulfillment operations. This year we had an unexpected loss of a warehouse facility during our peak shipping season, requiring us to quickly transfer operations to an unwired site. Waiting several weeks for a new land line would have destroyed our business; we needed an immediate data solution. Within a day we had a Junxion Box with cellular data service supporting all of our requisite online business tools and LAN functions across a multi-seat environment. The Junxion Box literally saved our 2004 shipment season."

- Tim Moxey

President

University of Washington

education customer

mobile work teams, event connectivity

"Our faculty and staff need hassle-free Internet connectivity while off-campus. While existing CDMA wireless data service networks offer the connection speeds and coverage we need today, the Junxion Box makes it much easier for diverse individuals to get connected using virtually any laptop computer."

- Scott Schramke,

Lecturer & Senior Computer Specialist, Information School

Olympic Associates Company

construction management customer

portable networks

"The Junxion Box solution is really a breakthrough resource for competitive construction management teams. Making it easier to connect to various cellular data services, combined with LAN functions, is anticipated to be a better way - sometimes the only way - to provide the data infrastructure that is needed at job sites, even in remote locations."

- Jessica Hickey

Sr. Project Manager/Value Specialist

Zumasys

wireless mobility solutions provider

event connectivity

"When we host events like technical seminars, reliable Internet service is vital for our staff, partners and visitors. The Junxion Box provides us with data connectivity and a combo wireless/wire-line LAN infrastructure that is not only reliable, flexible and scalable, but easily saves us hundreds of dollars at every event."

- Joe Goebel

Chief Operating Officer
