

Quick Start Card

Getting started. This card provides the highlights most users need for a basic configuration. Refer to your User Guide or visit www.junxion.com/support for further help.

1. Insert your cellular modem card into the Junxion Box.
2. Power up the Junxion Box. Wait two minutes.
3. Connect your computer to the Junxion Box using the crossover Ethernet cable that was included.
4. When the status light is solid, you know the Junxion Box is successfully connected to the Internet.

Other configurations. For advanced configurations, go to the Device Manager with a browser at 192.168.2.1/admin. The default username is “admin” and password is “junxion”.

Here you can manually configure your cellular modem card, Junxion Box security features, remote management, and other settings.

Updates. Junxion regularly releases new firmware and revised User Guides. Download the latest at www.junxion.com/support.

Registration. Please register at www.junxion.com/register to ensure your Junxion Box is setup for warranty and support.
